About Me

I am a results-oriented individual who approaches problems with practicality and creativity. With a strong academic background in both back-end and front-end system development, I have experience working with a variety of languages, frameworks, and databases. Additionally, I am skilled in using GIT and GITHUB for version control and have obtained certification as a TICs Operator. My expertise in Scrum allows me to effectively drive progress in development projects, and I have experience with IoT and managing cybersecurity practices according to CISCO's standards. I am seeking an internship in software engineering to expand my technical and interpersonal skills.
