Técnico en instalación de energía eólica

Jonathan Pineda Alemán

Student from Systems Engineering / intern (UNA - 2023)
Alajuela, Costa Rica

Extracto

As a results-oriented individual, I strive to approach problems with both practicality and creativity. I believe in the power of personal introspection to drive continuous improvement and actively seek out opportunities for learning and expanding my knowledge. Being bilingual, proactive, communicative, and intuitive allows me to effectively connect with others and drive progress. I am seeking for an Intership in sotfware engineering that will allow me to expand my technical and interpersonal skills.

In my technical experience, I possess a strong academic background in both back-end and front-end system development, utilizing high-level languages such as PHP, C++, and C#. I also have experience working with a variety of frameworks, including Laravel, AngularJS, and ASP.NET Core. Additionally, I have worked with databases such as ORACLE, MySQL, and AMAZON RDS. I am good at using GIT and GITHUB for version control, and I have obtained a certification as a TICs Operator from the INA. My expertise in the agile development framework of Scrum (SFC) enables me to effectively drive progress in development projects. Lastly, I have experience with IoT using the CISCO Packet Tracer tool, and have a strong background in managing cybersecurity practices according to CISCO's standards.
